Helpful reminder notifications

Track symptoms daily with easy to follow survey
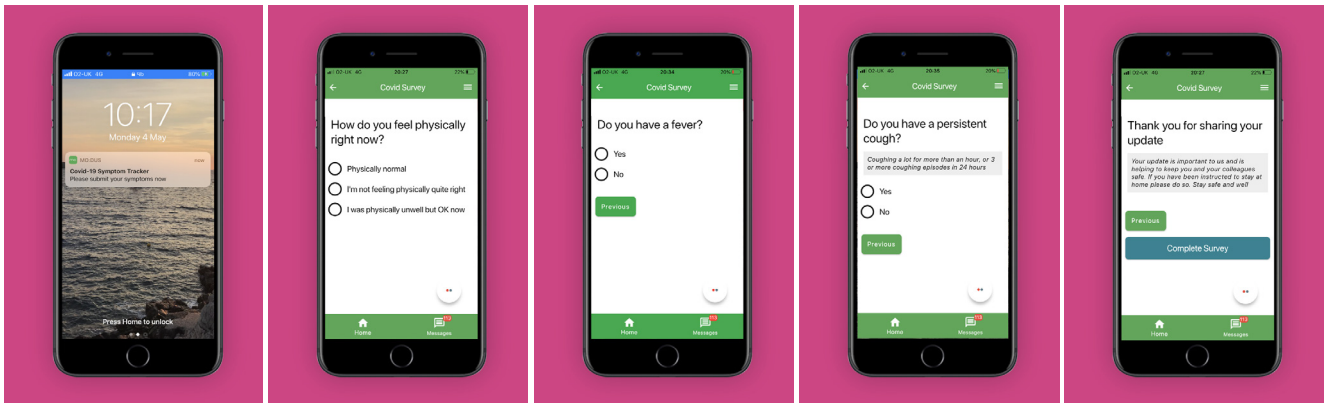

Based on simple health questions

Takes 30 seconds each day to protect yourself and others

Helps you understand COVID-19 in your workplace

Mo:dus symptom tracker app: monitoring signs of COVID-19 for the safety and wellbeing of everyone

As part of our ongoing investment in using digital tools to enhance your, clients, and colleagues work lives we have developed a new app, part of Mo:dus. The ethos of Mo:dus is to create transparency, aid risk management, and enhance our clients' lives and this new COVID-19 symptom tracker app will help everyone to protect the wellbeing of colleagues, family and friends, and support organisations' back to work plans.

mo:dus

A simple way to protect people

This is done by submitting any symptoms daily via a simple step by step process. The app will share the latest self-isolation government guidance based on the information given, mitigating the risk of spreading the virus by staying at home.

The more people that use the app the more effective it becomes as it means that those showing symptoms will not attend the workplace and won't be bringing the virus in to the premises. This is essential in reducing the risk of transmission as your colleagues in the workplace in turn do not contract the virus and subsequently do not pass it to other colleagues, clients or their loved ones when they return home.

Avoid a localised outbreak

The app will also help to protect you from a localised outbreak of the virus which could result in a second lockdown and at a significant cost to business & community.

The app will mean you can proactively manage self-isolations amongst your workforce and reduce transmission by coordinating and minimising team interactions where symptoms are recorded post meeting.

That extra peace of mind

This tool is designed to give you and your teams peace of mind that you are doing everything you can to protect them in the workplace. You can demonstrate to them, and your clients and visitors, that you are harnessing valuable data to inform the right behaviours for the good of everyone.

Available on the App Store

GET IT ON Google Play

- Download the App today from the Play Store or App store

- First visit survey to pick up historic symptom data where applicable

- Daily scheduled in app push notifications for daily symptoms response

- Automated isolation prompts where applicable symptoms logged

- Real time alerts for COVID-19 cases and escalations (available for team members and line managers)

- Ability to submit key worker CODID-19 test results

- Quick seamless mobilisation of workforces participating, with minimum data requirements (all GDPR compliant)

- In app isolation update tracking to help colleagues and organisation better understand labour availability

- App follows public health guidelines and also contains useful links

- Trended reporting available on desktop to help organisation that may have larger national workforces for example
